# Prefinished Mouldings and Trim

# Why Choose Sauder Prefinished Wood Products?

Builders and Developers ask:

## Why should I use prefinished products?

What are the benefits to me and my business? Will this product make my operation more profitable? The simple answer is yes, and here's why:

- Lower overall cost when compared to other finishing products.
- Fast easy installation as the product can be installed and filled in one step.
- Time savings! On average most contractors experience a significant time saving in project completion.
- Better sub-contractor scheduling.
- No site finishing required.
- No call backs which add up to significant time and money savings.
- Packaging and shipping through distributors who will coordinate shipments to your subcontractor's schedule, ensuring that the product is on site when you need it, eliminating costly delays.
- Distributors who are fully stocked, eliminating delays due to material shortages.

Factory finished mouldings are consistent from piece to piece, with no knots, splits or warp, therefore keeping waste to a minimum. Sauder offers a wide selection of products and finishes to meet your needs. We have available a variety of raw materials that include solid wood, fingerjoint, MDF and selected choice veneers. As with all of our products, you have our assurance of quality and satisfaction.

## FLEXIBILITY AND CO-ORDINATION

Sauder's prefinished products are color co-ordinated to the doorskins of all major door skin manufacturers. We are always ready to work with you to come up with new and exciting product combinations that fit your designs and specifications.

## EASE OF REPLACEMENT

Replacement materials will match the original, eliminating any on-site finishing that is required with other products.

## THE FINISH

Factory finishing has the following advantages:

- Uniformity of color.
- Replacement material consistent with original.
- No lap marks or streaking.
- Durable finish.
- Maintenance free.

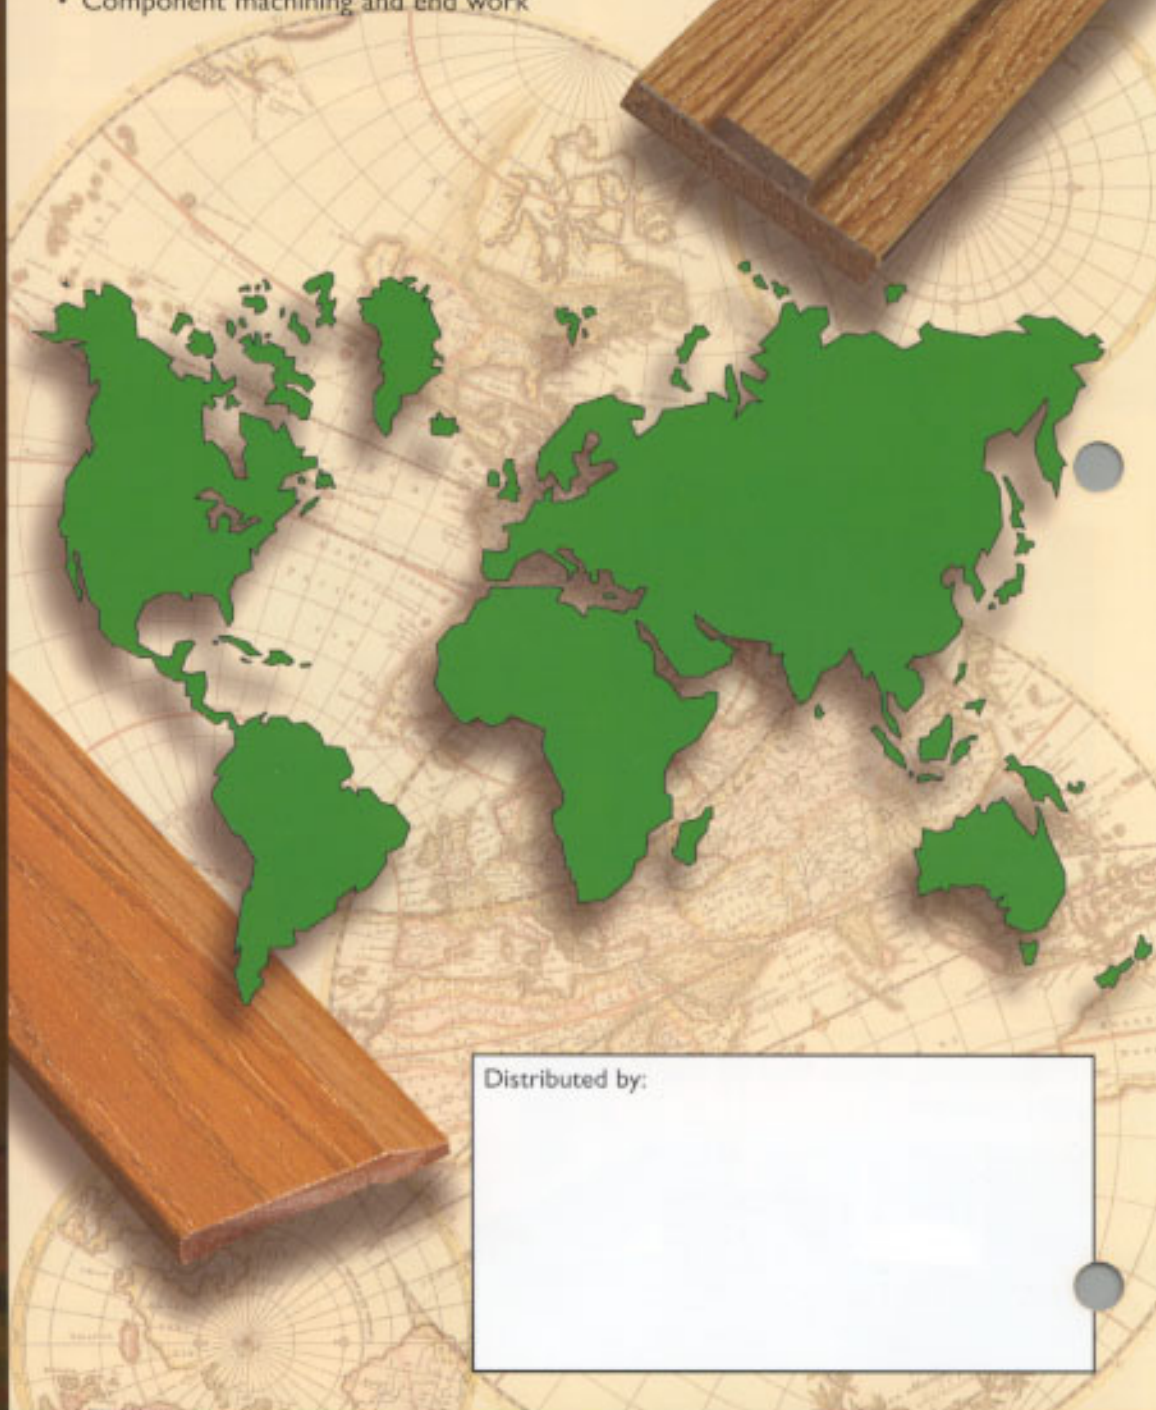

Note: colors may not be exactly as shown.

# About the Company
